maintenance services.

Capability Statement

# COMPANY OVERVIEW

Envirolinx is a trusted provider of sustainable landscaping solutions across Victoria, known for our commitment to environmental responsibility and high-quality service. We specialise in delivering tailored landscaping and maintenance services to local governments, property developers, body corporates, and residential clients. With extensive experience across a range of projects, we bring a practical and innovative approach to every outdoor environment we work on.

Our team is skilled in both hard and soft landscape construction, tree planting, revegetation, arboriculture, and the installation of public space amenities. We also offer comprehensive maintenance programs and reliable watering services to support long-term landscape health and usability. From revitalising local parks to supporting new developments with eco-conscious design and construction, our work promotes sustainable, inclusive, and vibrant outdoor spaces.

At Envirolinx, we are passionate about creating greener, more liveable communities—enhancing both the natural environment and the everyday experience of the people who use it.

# WHAT WE STAND FOR

## Our Mission

To enhance communities and the environment through innovative, sustainable landscaping solutions that connect people to green spaces and leave a lasting positive impact.

## Core Values

### Sustainability

We prioritise eco-conscious practices that support long-term environmental health.

### Integrity

Honest, transparent service is the foundation of everything we do.

### Excellence

We uphold the highest standards in quality, safety, and professionalism.

### Community

We work to enrich lives by creating welcoming, functional outdoor environments.

### Collaboration

Strong partnerships with clients and stakeholders ensure successful outcomes.

# WHO WE ARE

Envirolinx is a trusted provider of sustainable landscaping and environmental solutions, proudly serving communities across Victoria. Our expertise spans hard and soft landscaping, revegetation, tree planting, arboriculture, public space infrastructure, concrete and hardstand solutions, and long-term landscape maintenance. Every project we undertake is grounded in a commitment to quality, environmental care, and community value.

At the heart of Envirolinx is Luke Darmanin, Director, who brings over 32 years of hands-on industry experience. Luke remains closely involved in project delivery, ensuring that the company's strong reputation for reliability and environmental responsibility is upheld at every stage.

Supporting Luke in leading the business is Chris Barclay, our Operations Manager, with 21 years of industry experience. Chris plays a key role in overseeing daily operations, coordinating crews, and ensuring projects are completed safely, efficiently, and to specification.

Together, Luke and Chris lead an experienced and highly capable team of landscape professionals who take pride in their work and share a passion for building greener, more functional spaces. Their guidance ensures that every team member is aligned with Envirolinx's core values of integrity, sustainability, and excellence.

Envirolinx is proud to work with a wide range of clients, including local and state governments, developers, education providers, civil contractors, and residential property owners. Whether revitalising a public park, installing tree corridors, or maintaining streetscapes, we're driven by a clear purpose — to create outdoor environments that enrich communities and stand the test of time.

# CORE CAPABILITIES

## Hard Landscape

Hard landscape solutions form the durable foundation of outdoor spaces, blending function with visual appeal. From paving and retaining walls to decking and concrete works, they define areas, guide movement, and enhance usability.

## Soft Landscape

Soft landscaping brings outdoor spaces to life through plants, turf, soil, and mulch. It enhances aesthetics, improves air quality, and supports biodiversity while softening built elements with natural textures and seasonal colour.

## Tree Planting

We carefully source and plant trees suited to your environment, ensuring long-term growth and success. Our comprehensive service includes soil preparation, proper staking, mulching, and tailored watering plans for healthy tree establishment.

## Revegetation

Using specialised equipment and proven techniques, we carefully remove, transport, and replant mature trees with minimal stress. Our process ensures tree health, structural integrity, and successful re-establishment in their new location.

## Maintenance

Our landscape maintenance programs include tree maintenance, mowing, edging, pruning, fertilising, pest control, and irrigation system checks. These services work together to ensure your outdoor spaces remain healthy, vibrant, and pristine year-round.

## Watering Services

Our fleet delivers bulk water for tree establishment, turf hydration, and dust suppression across construction and revegetation projects. We also offer smaller-scale watering services for gardens, planter boxes, and residential landscaping needs.

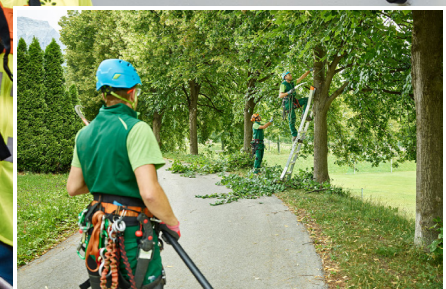

## Hardstand & Concrete Solutions

Our hardstand and concrete solutions provide durable, low-maintenance surfaces for high-traffic areas. Ideal for car parks, paths, and infrastructure zones, we deliver strong, stable foundations tailored to commercial and residential needs.

## Furniture & Amenities

Envirolix delivers innovative public-space installations that encourage active community use, and promote sustainable, inclusive environments. Our solutions blend functionality with design to create inviting, long-lasting shared spaces for all.

## Arboriculture

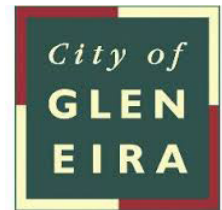

Our qualified arborists offer expert tree assessments, precision pruning, safe removals, and tailored health management plans. We ensure the safety, vitality, and longevity of trees across both public landscapes and private properties.
